

October 2021

Dear Parent/Carer,

We are looking at running a trip on the 6th of February 2023 to Oxford for students to attend GCSE Science Live. The event hosts a number of prominent names in science as well as examiners who will deliver an overview of the GCSE curriculum in a dynamic and engaging way.

This was a successful and beneficial trip for attendees so we are looking to increase the group limit this year.

The day offers:

- The chance to see and hear five of Britain's top scientists, all working at the cutting edge of their specialisms. These scientists are chosen for their ability to communicate with students of this age.
- Help improving your science GCSE results with top tips on examination success from an experienced science examiner.

The day will be thought fast moving, thought-provoking and will give students the chance to raise issues with the scientists. The end goal of the day is to improve student enthusiasm in science subjects which we hope will improve their performance at science GCSE.

If you would like to register your interest in this trip with us then please complete the form by Monday 17th October:
